Application No.: 10/750540 Docket No.: SMCY-P02-099

AMENDMENTS TO THE CLAIMS

Claims 1-13 (Canceled)

14. (Currently amended) A mattress comprising

a substantially rigid bottom panel;

a perimeter sidewall joined to the bottom panel, said bottom panel and perimeter sidewall defining an interior cavity; and

an innercore having a bottom surface, said innercore disposed within the cavity,

wherein said a portion of the bottom surface of the innercore is [[secured]] joined to the bottom panel by an adhesive [[at least]] in a region proximate to the perimeter sidewall, with a remaining portion of the bottom surface being unattached to the bottom panel.

- 15. (Original) The mattress of claim 14, wherein the innercore comprises pocketed springs and the adhesive bonds fabric surrounding the pocketed springs to the bottom panel.
- 16. (Currently amended) A mattress comprising

a platform made of a composite material comprising one or more materials selected from the group consisting of foam, wood, and plastic;

a perimeter sidewall joined to the platform, said platform and perimeter sidewall defining an interior cavity; and

an innercore <u>having a bottom surface</u>, <u>said innercore</u> disposed within the cavity and [[secured]] <u>said bottom surface joined</u> to the platform by an adhesive [[at least]] <u>in a region</u> proximate to the perimeter sidewall, <u>with the bottom surface being unattached to the bottom panel away from the perimeter sidewall</u>.

Application No.: 10/750540 Docket No.: SMCY-P02-099

17. (Previously presented) The mattress of claim 16, wherein the platform comprises a plurality of layers.

- 18. (Previously presented) The mattress of claim 16, wherein the mattress is a two sided mattress, with the platform forming a second sleeping surface.
- 19. (Previously presented) The mattress of claim 16, wherein the platform comprises a high density polyurethane foam having a density of approximately 1.85 lbs./cu. ft. and a firmness above 30 ILD.
- 20. (Previously presented) The mattress of claim 14, further comprising an upholstery layer disposed over a top surface of the innercore.
- 21. (Previously presented) The mattress of claim 14, wherein the perimeter sidewall is made of foam.
- 22. (Previously presented) The mattress of claim 14, wherein the bottom panel comprises a layer of high density foam.
- 23. (Previously presented) The mattress of claim 14, wherein the bottom panel forms a substantially rigid base platform that comprises a layer made of a material selected from the group consisting of wood, cardboard, plastic or foam, said material capable of providing support to the innercore.
- 24. (Previously presented) The mattress of claim 14, wherein the innercore is selected from the group of open coil innercores, fabric-encased spring coil innercores, and springs in foam innercore.
- 25. (Previously presented) The mattress of claim 14, wherein the innercore comprises a block of resilient foam.
- 26. (Previously presented) The mattress of claim 14, wherein the perimeter sidewall is attached to a peripheral region of a major surface of the bottom panel by an adhesive.

Application No.: 10/750540 Docket No.: SMCY-P02-099

27. (Previously presented) The mattress of claim 14, wherein the perimeter sidewall comprises a plurality of sidewall sections.

28. (Previously presented) The mattress of claim 14, and further comprising a wire for securing the innercore against the substantially rigid bottom panel.

Add new claims 29-34:

29. (New) A mattress, comprising,

a substantially rigid base platform,

a perimeter sidewall attached directly to the substantially rigid base platform and defining an interior cavity,

an innercore disposed within the cavity, and an upholstery layer disposed over a top surface of the innercore.

- 30. (New) A mattress according to claim 29, wherein the perimeter sidewall is attached directly to the substantially rigid base platform by a mechanical fastener or by an adhesive joint, said adhesive joint selected from glue, tape and adhesive patches.
- 31. (New) A mattress according to claim 29, wherein the substantially rigid base platform comprises a layer of high density foam, wood cardboard, or plastic, or a combination thereof.
- 32. (New) A mattress according to claim 29, wherein the innercore is selected from the group consisting of foam innercore, springs in foam innercore, open coil innercore, and fabric encased spring coil innercore.
- 33. (New) A mattress according to claim 29, further comprising a layer of sheeting disposed over an exterior face of the substantially rigid base platform to provide a non-upholstered non-sleeping surface.
- 34. (New) A mattress according to claim 29, further comprising a border wire for securing the innercore against the substantially rigid base platform.
